## Agora, Inc. Reports Third Quarter 2025 Financial Results

SANTA CLARA, Calif., November 19, 2025 (GLOBE NEWSWIRE) – Agora, Inc. (NASDAQ: API) (the “Company”), a pioneer and leader in conversational AI and real-time engagement technology, today announced its unaudited financial results for the third quarter ended September 30, 2025.

“We’re pleased to report our fourth consecutive quarter of GAAP profitability in Q3, supported by double-digit revenue growth and expanding margins,” said Tony Zhao, Founder, Chairman, and CEO of Agora, Inc. “Our core real-time engagement platform-as-a-service business is rebounding strongly and is on track to deliver its first full-year revenue growth since the pandemic—providing a stable, profitable foundation for the company. At the same time, we’re significantly increasing our investment in conversational AI. Recent product launches—including Conversational AI Engine 2.0 and Conversational AI Studio—are designed to help developers build more natural, human-like voice agents with greater ease. Early adoption from customers worldwide is encouraging, and our pipeline of use cases and prospects continues to grow heading into next year.”

## **Operating Metrics**

The Company also uses other operating metrics included in this press release and defined below to assess the performance of its business.

### ***Active Customers***

An active customer at the end of any period is defined as an organization or individual developer from which the Company generated more than \$100 of revenue during the preceding 12 months, excluding customers from Easemob. Customers are counted based on unique customer account identifiers. Generally, one software application uses the same customer account identifier throughout its life cycle while one account may be used for multiple applications.

### ***Dollar-Based Net Retention Rate***

Dollar-Based Net Retention Rate is calculated for a trailing 12-month period by first identifying all customers in the prior 12-month period, and then calculating the quotient from dividing the revenue generated from such customers in the trailing 12-month period by the revenue generated from the same group of customers in the prior 12-month period. As the vast majority of revenue generated from Agora's customers is denominated in U.S. dollars, while the vast majority of revenue generated from Shengwang's customers is denominated in Renminbi, Dollar-Based Net Retention Rate is calculated in U.S. dollars for Agora and in Renminbi for Shengwang, which has substantially removed the impact of foreign currency translations. Shengwang excluded the revenues from certain end-of-sale

---

products. The Company believes Dollar-Based Net Retention Rate facilitates operating performance comparisons on a period-to-period basis.
